

INTRODUCTION

This Bluetooth module features Bluetooth/U-disk/TF-card playback, and Bluetooth call function, supporting simple and clear serial port control function, BLE pass-through, and SPP pass-through functions. The highlight of this product is the dual-mode Bluetooth, which also means that it can run the Bluetooth audio playback and data transmission at the same time, greatly reducing the development difficulty of embedded Bluetooth in other products.

FEATURES

Support MP3, WAV, WMA, FLAC, AAC, APE Audio

Support 128GB U-disk and TF card

Bluetooth audio transmission and control

Bluetooth call control

Support BLE and SPP pass-through function

SPECIFICATION

Power Supply: 3.3V~5V

Operating Current: 20mA

Communication: UART

Bluetooth: 5.0

Operating Temperature Range: -40°C~80°C

Operating Humidity Range: 5%RH~95%RH

Dimension: 45*42mm/1.77*1.65"
